grass.eu

One system concept for all concealed applications.

Nowadays, manufacturing companies in the furniture industry have to contend with market requirements that are constantly changing. The use of high-quality, flexible movement systems is vital for overcoming this challenge in a manner that is cost-efficient, saves time and conserves resources.

The thoroughly tried-and-tested DYNAPRO Soft-close concealed slide, combined with the TIPMATIC SOFT-CLOSE opening system for handle-free fronts and the purist VIONARO drawer system mean that GRASS is able to offer a smart, multi-purpose solution for every application. This solution enables users to manufacture drawers from wood or steel while minimising the amount of parts used and capital invested. Fronts can be provided with or without handles.

The TIPMATIC SOFT-CLOSE opening system plays a key role in this solution. It combines a mechanical opening solution for handle-free fronts (Tipmatic) with an elegant, damped drawer closing mechanism (Soft-close). One particular highlight of this system is that installation on the slide does not require any tools and only one opening unit is needed due to the three integrated force settings, whether you're using small or extra-wide drawers.

VIONARO V8

DYNAPRO SOFT-CLOSE

TIPMATIC SOFT-CLOSE

DYNANEO 30 KG

This innovative alternative offers outstanding performance up to 30 kg.

Adjustment technology in five dimensions for a perfect front panel alignment.

Height, side, tilt and depth adjustments do not require tools on wooden drawers with Dynapro. All adjustment levers and wheels are easy to access and simple to use. This achieves flawless front panel alignment in just a few steps.

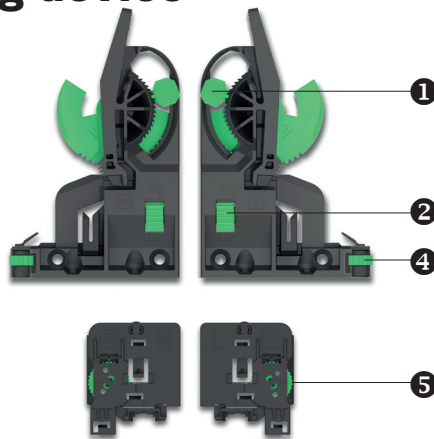

With optional radial adjustment, GRASS enables an additional fifth dimension.
