COMPLIANCE STATEMENT

FOR EC DECISION 2009/251/EC

USE OF THE BIOCIDES DIMETHYLFUMARATE (DMF)

Commission decision 2009/251/EC dated March 17, 2009 requires member states to ensure that products containing the biocide dimethylfumarate are not placed or made available on the market, starting May 01, 2009.

European Directive 2009/251/EC bans Dimethyl fumarate (DMF) from being placed in the EU market in consumer products. DMF is a biocide that is typically used in desiccant bags when shipping goods in humid climates to prevent mold damage. Exposure to DMF has led to painful skin contact dermatitis, including itching, irritation, redness, and burns.

As of the date of this letter we confirm that DMF is not contained in any products supplied to GRASS Group and that we comply with Commission decision 2009/251/EC (DMF CAS-Nr. 624-49-7). With respect to product packaging materials, the supplier verifies with their entire supply chain that there is no use of DMF associated with any certain packaging materials.

For any questions exceeding the content of this statement please feel free to contact our environmental protection officer:
